# Welcome to Project POMA!

The ultimate collaboration within Project POMA offers companies, organizations, and governments the most advanced blockchain technology in the world.

OUR VISION

People, companies, organizations, and governments working with Project POMA and the POMA blockchain platform to improve financial, social, and environmental well-being.
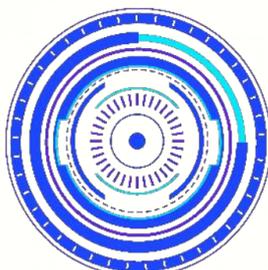

OUR MISSION

Project POMA will be the catalyst in bringing collaborative blockchain technology to organizations and people throughout the world by providing a decentralized platform for a better daily life through education, economic efficiency, job creation, social innovation, and business development.

The POMA Blockchain

All projects under Project POMA's umbrella utilize POMACOIN, a token from the POMA blockchain that is built on NEO's core code base.

Specifications:
- Max POMACOIN supply: 5 billion
- Max POMAGAS supply: 5 billion
- Distribution supply for communities: 2.5 billion
- Foundation reserve supply: 1.25 billion
- Worldwide team and partners 6 year supply: 1.25 billion
- Block generation rate: less than 15 seconds

*POMACOIN will initially be distributed as an ERC-20 token until the launch of the POMA blockchain mainnet, which is currently in the testnet phase.
Contract Address: 0xdf4df8ee1bd1c9f01e60ee15e4c2f7643b690699

- PROJECTS : PROJECT POMA -

After more than five years of development and research, the founding team has developed a series of projects that will be launched iteratively as soon as the POMA blockchain platform mainnet is operational.

Turnkey Payment Gateways
E-commerce platforms, webshops, and websites can implement the turnkey payment systems with just a few clicks.

Logistics
Simplifying the transport industry with blockchain technology! Value transports are fully tracked via the monitor platform.

Healthcare
In conjunction with medical research centers and hospitals, we develop medical devices that utilize blockchain technology as well as a Private Healthcare Data Network on the POMA blockchain.

Energy
Energy consumption is minimized and a cost/revenue balance is achieved through the use of our intelligent blockchain-based systems.

Education
Partnering with universities around the globe, POMA Academy offers real-world training experiences to people in all 195 countries.

Freelancing
The interactive business directory within pomapages.com allows people, companies, and freelancers all over the world to truly adopt cryptocurrency.

Gaming
The POMA gaming platform features all the benefits of POMA blockchain capabilities, making it the ultimate web-based application.

Local Governments
Our goal is to have job-training projects coordinated by local governments around the world, creating a social innovation ecosystem between our students and local governments.

- PiiS FOR BUSINESS : BLOCKCHAIN MADE SIMPLE -

We believe that using blockchain applications should be as easy as sending an email. The POMA Intuitive Interface System (PiiS) enables every user to seamlessly interact with our block-chain based business tools. End users, regardless of their technical knowledge, can easily and efficiently embrace all benefits blockchain has to offer.

IMPROVED SECURITY AND AUTHENTICATION

RESULTS FOCUSED BUSINESS TOOLS

PAYMENTS AND DIRECT OWNERSHIP

REDUCE BUSINESS IT COSTS

-How to Get Involved in Project POMA-

Project POMA strives to have a "blockchain for everyone". Therefore, anyone who is willing to be involved in Project POMA may sign up to become a team member. Experience is not required!
